

Regulator 510 AC Pressure 0-1.5 Bar

Item No.: 211213811

Product information

Oxy-Acetylene Gas Regulators and OCIMF Compliance keeps the cylinder pressure constant and reduces it to suitable working pressure. Gas regulators should be replaced with maximum 5 years intervals as a rule, because internal seals and membranes will deteriorate with time. Faulty, old or corrodes regulators should be replaced and repairs should never be attempted on them.

Features

- Comes with hose connections for 1/4" and 3/8"
- Built according to international norm EN ISO 2503 Class 3
- Provides constant flow of gas at right pressure
- Safety valve

Benefits

- No need for flame adjustment during work
- Provides safe working conditions
- Connects to all standard hose dimensions
- Long lasting quality

Specification

General:	Invent Hazard Material (IMO/EU) classification	NA
-----------------	-------------------------------------------------------	----

Dimensions /Weight:	Connection (size/type)	3/4" BSP
	Depth [mm]	100
	Length [mm]	160
	Width [mm]	115

Technical Data:	Inlet pressure [bar]	15 maximum
	Safety outlet opening pressure [bar]	3
